18 May

Clearing toward morning. Night temperatures falling to around zero; 2 degrees below in scattered localities. High around 8 - 10 degrees in the afternoon. Light northerly wind. Tomorrow, continued cold with morning frosts and clearer.

20 May

Cloudy with occasional breaks in the ceiling. Mild northerly wind, high today around 8 - 10 degrees; low tonight around zero with minus 2 to minus 3 degrees in the lowlands. Tomorrow, more showers and somewhat warmer.

21 May

Overcast at night with occasional rain. Partial clearing during the day with scattered showers. Low tonight around 5 degrees, high this afternoon around 12 degrees. Brisk northerly breeze. Tomorrow, slightly warmer.

22 May

Danger of slight frost at night with diminishing cloudiness. Scattered cloudiness to overcast during the day with a high of around 12 to 14 degrees. Local northwest winds. Tomorrow, continued slight rise in temperature.

24 May

Continued slight northwest wind with occasional showers. Low tonight about 6 degrees, high around 16 degrees. Tomorrow, continued possibility of showers and somewhat colder.

25 May

Cloudy to overcast with local showers. Low tonight around 7 degrees, high around 15 degrees. Mild northwesterly wind. Tomorrow, little change in temperature.

27 May

Cloudy during the day with mild northwesterly wind; scattered showers in the mountain regions. Low of 4 - 6 degrees toward morning and occasionally dropping to zero in border areas where skies are clear. High this afternoon 10 - 12 degrees. Tomorrow, cool with increasing cloudiness and scattered early morning frost.

28 May

Cloudy today with chance of showers or thunderstorms toward evening, beginning in the northwest. Low around 6 - 8 degrees, high around 14 - 18 degrees. A mild southwesterly wind, changing to westerly and increasing in velocity. Tomorrow, showers and somewhat cooler.

RESTRICTED

STAT

8 June

Broken cloudiness with scattered showers. High around 20 degrees; low of 10 - 12 degrees. Mild to fresh northwesterly wind. Tomorrow, some temporary improvement.

10 June

Considerable cloudiness with local showers. High of 17 degrees; low around 10 degrees. Mild westerly wind. Tomorrow, little change in temperature.

12 June

Continuing increase in cold air from the northwest is creating considerable scattered cloudiness with showers. High around 17 degrees; low of 10 degrees. Tomorrow, little change in temperature.

13 June

Overcast in the morning with light northeasterly wind. Increasing cloudiness from the northwest during the afternoon with occasional showers. Increased wind velocity. High around 22 degrees; low between 8 - 10 degrees. Tomorrow, continued cloudy with showers and somewhat cooler.

14 June

Fair this morning with increasing cloudiness from the west by afternoon and chance of showers and scattered thunderstorms. Low around 10 degrees, high of 25 degrees. Light southeasterly wind. Tomorrow, increasing cloudiness.

15 June

Partly cloudy with morning mist. Cloudy in the afternoon with scattered showers and thunderstorms in the mountains. Low around 12 degrees, high of 24 degrees. Light westerly wind. Tomorrow, showers and somewhat cooler.

17 June

Slight intermittent cloudiness due to the influence of cool air from the ocean. Increasing cloudiness toward evening. Low of 10 - 12 degrees, high around 20 - 23 degrees. Light westerly wind. Tomorrow, increasing cloudiness and bad weather.

19 June

Considerable cloudiness with showers and scattered thunderstorms; westerly to northwesterly wind. Low tonight around 13 degrees, high around 20 degrees. Tomorrow, some cloudiness and less windy.
